

Glove adaptor

The ideal upgrade for OSMA shoe and boot dryers

sample picture: OSMA glove adaptors

The new glove adaptors are the ideal upgrades for OSMA shoe and boot dryers. Damp and wet gloves can be dried efficiently and swiftly. The flexible adaptors with movable fingers are suited for various glove models and not only reduce the drying time, but are also gentle to the material.

Advantages

The warm airflow goes directly to the fingertips.

Movable fingers allow an easy positioning of the gloves on the adaptor.

The adjustable funnel holds the warmth inside the glove, while dampness is blown out. Additionally, the funnel adjusts to different shaft lengths.

The glove adaptors are made of sturdy polyamide, designed for special and particular demanding purposes.

The flexible PVC tube makes it easy to fit the adaptors on OSMA shoe and boot dryers

Technical details

- width/height (in mm): 150/500
- weight per pair: 500 g
- color: anthracite/black
- material: robust polyamide, PVC
